- Data to Care
  - In the process of expanding it – working with 4 health departments currently
  - We are also piloting a central output report
- We are waiting on a notice of an award from the CDC. Marijane and Dr. Obriri submitted the application for funding in September. We've been informally approved for it.
- STD and HIV are working together to create a manual for field staff, with STD taking the lead. This will give providers direction and consistency.
- Our data managers are working together to create a dashboard which will show the integration of data in real time.
- Cheryl and Marijane were invited to Philly in November. Philly received a grant for ending the epidemic and our staff were invited to talk about our collaborative efforts going on with Philly.
  - It was a very informative conference. For example, we learned from a doctor who works in Africa that they obtained an 85-90% retention rate in their work using peer navigators, which is outstanding considering the distance many individuals have to travel for care.
- Cheryl Henne (Care Section)
  - Staff
    - Our Public Health Program Administrator position has been filled by Wendy Sweigart
    - One of our Public Health Program Administrative Assistant positions has been filled by Rob Smith
    - Our Clinical Quality Management Coordinator position has been filled by Lisa Irwin
    - Our fiscal support, dealing with rebates for SPBP, was previously Lindsay Pitten, but she has taken a promotion
    - Carma Solomon has also taken a promotion in another department
  - Our Competitive Continuation committed to continue to receive grant funds (funds April 2020-21)
  - Our regional grantee meeting finished up yesterday – it's always very helpful to hear how things are progressing at these meetings
  - CAREWARE is HRSA's Ryan White data emission system and is on the verge of rolling out a new version that is almost a complete redo. The new version has web-based abilities which will allow networking for all CAREWARE throughout the Commonwealth. There are concerns around confidentiality. Looking to install this in the near future once kinks are worked out and staff is trained.
  - Our monitoring season is coming soon.

- Our HRA site visit is January 14<sup>th</sup> and 16<sup>th</sup>. This will provide fiscal staff, regional grantees, and consumers a chance to speak with HRSA.
  - Two of our staff members went to a HRSA reverse site visit training. The training ran through the entire grant and all Ryan White guidelines. It was essentially a crash course in all things Ryan White.
- John Haines (SPBP)
    - Our online enrollment system – recently posted 3 training videos on the SPBP website that are for client portal trainings.
    - We will hopefully officially release our case management portal soon. We just had an official training and are still working out some kinks.
    - If local or county jails do not provide medications, SPBP has been able to provide some medications directly to clients. This does not apply to state and federal prisons. There are some hoops to jump through for this process, including working with jail directors and clients’ case managers, in addition to if there is a specific pharmacy that the jail uses.
    - Next meeting is a conference call on Thursday, January 30<sup>th</sup>, 2020 from 10am-12pm.
- Jonathan Steiner
    - Surveillance is now receiving a large majority of genotypes from labs that we are able to analyze. We are monitoring this closely for signs of outbreaks. There are none currently. We are still monitoring unique situations, like a year ago when there was an uptick in cases in Beaver County.
    - We are currently trying to pull data from as many sources as possible to make sure individuals are in care.
- Kyle Fait
    - Media campaign went June 24<sup>th</sup> to August 31<sup>st</sup>.
      - We have not gotten a report on it yet from the Office of Communications. We will hopefully have it at the February meeting. It will hopefully tell us what media platforms worked for us and what kind of impact the campaign had.
    - U = U
      - The Communications department has been sharing this message across all social media platforms through the Department of Health.
    - Communications is also working on RFP for next process of media campaign and will have the HPG and contractors weigh in on it.
    - The next media campaign will be a similar format as the last one, with different ads on social media and a 30-second spot.
    - Annual HIV Conference

- We are thinking of hosting statewide once every other year. We will hopefully have the first one in Pittsburgh or Philadelphia, with as many as 400 people.
      - We are looking at previous conferences and their agendas we attended for ideas on how to structure ours
    - We made updates to the SPBP brochure from last meeting after consulting the SPSP Advisory Council. It's being reviewed now and will come out in 2020.
- Jill Garland (Division Director)
  - Staff
    - We've completed interviews for a new Administrative Assistant position to work with field staff, coordinate meetings similar to the HPG, and provide administrative support to the Division. We will be making a recommendation soon.
    - We created a new Public Health Program Manager position who will report to the Division director and work with grants management. We have not started posting for this position yet but it may be up as soon as next month.
    - We created 4 additional field staff DIS positions. We made some decisions around where they will go. They will most likely add one position in the northwest, two in the southeast, and one in southcentral. Our field staff are very busy, especially with all the additional tasks we've taken on such as the CDC grant. Also, some long-term field staff have retired recently. There is a need for new people, especially in NE.
      - New staff will attend Passport for Partner Services training. We should hopefully be up to speed with new staff and trainings soon.
    - Our staff has plans to attend many conferences and trainings in the coming months.
  - Data
    - We are at a point where we are utilizing our data to not only drive our initiatives but using it in real time to intervene. An example of this is Data to Care. We've been able to compare data from sources we've had easy access to, such as surveillance data, against other data that we are just getting or haven't been able to get before. This is informing our choices. For example: if we can look across our data and see if an individual is diagnosed, engaged in care, virally suppressed, etc., then that's not only informative for us but also prevents us from doing unnecessary outreach.
    - Department is trying to convert our PA NEDSS disease surveillance system to a new CDC NEDSS based system. This transition will take some time, probably around 2 years. We are

doing this because we have the resources to do it and it works for our program by doing all the things we need it to, including better data like recording gender identity. NEDSS based system is designed to be responsive to federal funders. It will also be cheaper in the long run.

- Jill recently became acting Director of Bureau of Communicable... and is announcing today that she will be taking on that position full time. Will do a wide search to find the most qualified candidate to fill the Directorship position. It should hopefully be filled by the February meeting. Jill will continue her duties until a decision is officially made.
- Jill is honored and thankful to have been in her position for the time she has been with HIV and said this was not an easy decision. She is amazed by how far this body, the Division, and society has come in such a short period of time. She thanks everyone for being amazing and for their dedication and work to making that possible. She still plans to attend the HPG meetings when she can.
- **Thank you for everything you've done, Jill!**

#### **Bureau of Epidemiology (Monisola Malimo)**

- Pregnant women
  - At the September meeting, Dr. Obiri mentioned that there was a trend for reduced viral suppression in postpartum women. Many pregnant women had achieved viral suppression up until the delivery of their baby and then they lost their viral suppression.
  - We've received funding from CDC for a new position to help with these findings
  - A candidate has been hired and starts next month
- Viral load regulation
  - Has not yet been approved. Hopefully it will be next year, and will be using the surveillance data we have now
  - Jill Garland– “The proposed revisions to regulations were out for public comment and those comments are currently under review. This is the furthest we've ever gotten for complete viral load reporting and we are optimistic this change will happen. As for now, the data we do have continues to develop and become more concrete and clear.”

#### **Pitt (HPCP)**

- Acceptance Journeys
  - We've been working to refresh and update this project to include the state's LGBT history month proclamations to support stigma reduction. We ran another version of this display in Pitt's campus during October/LBGT history month. Had over 10,000 impressions over the course of the event.

<ul style="list-style-type: none"> <li>○ We also had another sub-recipient use these images and stories in their spaces to reduce stigma.</li> <li>● We have a new Capacity Building training about integrating Hep C testing. That training will start next month</li> <li>● We will launch a new version of the StopHIV.com website soon.</li> <li>● We sent two representatives to the Office of Health Equity Summit in Philly. Initial impressions are that it was extremely well attended. More info coming soon for anybody that wants it.</li> <li>● Project GLO opened in Harrisburg on November 18<sup>th</sup> and the event had a great turnout. Their regular hours start the week after Thanksgiving! <ul style="list-style-type: none"> <li>○ Their staff was encouraged to apply for HPG membership</li> </ul> </li> <li>● The City of Pittsburgh designated a day in September as Dr. Anthony Silvestre day. Dr. Silvestre was a state pioneer in LGBTQ rights and HIV advocacy and policy planning. He is now enjoying his retirement.</li> <li>● STD to PrEP is underway! That project, led by Dr. Sarah Krier, has hired two specialists: Harley Roth and Dr. Teagen O'Malley</li> </ul> <p><b><u>Due to time constraints, the rest of the announcements were deferred until the morning of Thursday, November 21<sup>st</sup>. Please see them on page 11.</u></b></p>

**Planning Partners**

- Susan Thompson
  - Attended a training webinar yesterday on HIV and stigma. She will archive it for future purposes.
  - January is adolescent health month
  - Bonnie Krampe is hosting a Viral Loads in Pregnancies training in March
  - As always, check our website for all up to date information and dates for upcoming trainings
  
- Michelle Clark (MMP)
  - New intern Heather Doyle has joined the team. Heather has her master's in Public Health and is helping out with interviewing individuals as well as many other tasks.
  - Reached January 15<sup>th</sup> goal for medical extractions and is two interviews away from their interview goal.
  - Need 21 more interviews for their April 15<sup>th</sup>, 2020 benchmark. It's more difficult as they get towards the end of the cycle to get more interviews.
  - The CDC took the MMP 2015-2017 data from interview questions and combined it with Philadelphia's MMP data to give a complete picture of the entire state of PA. Please reach out to her if you would like to see copies of the tables that lay this data out.
  - 2018 MMP data has just been processed by the CDC.

**Guests**

- GLO- project GLO is now open to the public!

**Community Co-Chair Passing of the Gavel**

Mike Hellman & Rob Pompa

- Mike Hellman formally passed the torch and recognized Rob Pompa as the new HPG Co-Chair for 2020-21. **Congratulations again, Rob, and thank you for all your service, Mike!**
