for more info email: [PAhealthresources@healthfederation.org](mailto:PAhealthresources@healthfederation.org)

The poster features a blue and green gradient background. At the top, the text 'HIV TREATMENT WORKS!' is written in large, bold, blue letters. Below this, a yellow speech bubble contains the text 'HIV medication is recommended for ALL people living with HIV'. To the right of the speech bubble is an illustration of a man in a blue suit holding a pen and a folder. Below the speech bubble, another yellow speech bubble contains the text 'You can take it orally daily or an injection every 2 months!'. To the left of this speech bubble is an illustration of a doctor in a white coat and a patient sitting on a bench. At the bottom left, the URL 'bit.ly/DOHmap' is displayed. At the bottom right, there is a small blue cross icon followed by the text 'for more info email: PAhealthresources@healthfederation.org'.

# Prevent HIV with PrEP!

- PrEP is highly effective at preventing HIV when taken as prescribed. Visit [bit.ly/DOHmap](http://bit.ly/DOHmap) to find places near you that offer PrEP!
  - #PreventHIV #PrEP #HIV #PADOH

**PREVENT HIV  
WITH PrEP!**

PrEP is a medication people  
can take to prevent HIV.

You can take it as a daily pill  
or an injection every 60 days!

**Talk to your medical provider about PrEP!**

# Prevent HIV!

- Using condoms and sterile drug equipment can greatly reduce the risk of HIV transmission. Visit [bit.ly/DOHmap](https://bit.ly/DOHmap) to find places near you that offer tools for HIV prevention!
  - #PreventHIV #GetTested #HIV #PADOH

**PREVENT HIV!**

HIV can be transmitted by blood, semen, rectal fluids, vaginal secretions & breast milk

Both female (internal) and male (external) condoms can prevent HIV!

Use sterile needles and works **EVERY TIME**

Pregnant people should get tested for HIV and treated if they're positive

[bit.ly/DOHmap](https://bit.ly/DOHmap)

# Prevent HIV during pregnancy!

- Pregnant people can prevent HIV transmission to their baby by knowing their HIV status. Visit [bit.ly/DOHmap](https://bit.ly/DOHmap) to find places near you that offer HIV testing!
  - #PerinatalHIV #PreventHIV #HIV #PADOH

**PREVENT HIV  
DURING PREGNANCY!**

HIV can be transmitted to the baby during birth and breastfeeding

All pregnant people should be tested for HIV twice during every pregnancy

If a pregnant person is HIV positive, HIV treatment and having an undetectable viral load can prevent transmission to the baby!

[bit.ly/DOHmap](https://bit.ly/DOHmap) for more info email: [PAhealthresources@healthfederation.org](mailto:PAhealthresources@healthfederation.org)

The infographic features a yellow background with a subtle pattern. It includes illustrations of a pregnant woman, a woman holding a baby, and a doctor consulting with a pregnant woman. The text is presented in dark blue and white boxes.

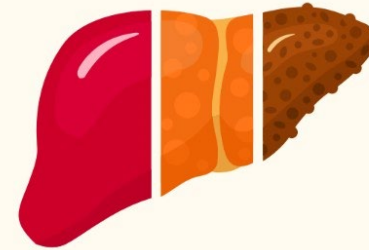

# Viral Hepatitis testing

- Viral hepatitis can cause inflammation and damage to the liver. Visit [bit.ly/DOHmap](https://bit.ly/DOHmap) to find places that offer testing for viral hepatitis near you!
  - #ViralHepatitis #HepatitisA #HepatitisB #HepatitisC #GetTested #PADOH

## ***Viral Hepatitis***

doesn't always present symptoms.

Talk to your medical provider.

***GET TESTED!***

# It Takes 2 Tests

- You need an antibody test and an RNA test to diagnose hepatitis C. Visit [bit.ly/DOHmap](https://bit.ly/DOHmap) to find places near you that offer hepatitis C testing!
  - #HepatitisC #HepC  
#ItTakesTwo #GetTested #PADOH

**IT TAKES 2 TESTS**  
TO DIAGNOSE HEPATITIS C (HCV)

**ANTIBODY TEST**  
This test looks for antibodies, which are made by the immune system.  
**A POSITIVE ANTIBODY TEST MEANS THAT SOMEONE HAS BEEN EXPOSED TO HCV.**

**RNA TEST**  
This test looks for hepatitis C virus in the blood.  
**A POSITIVE RNA TEST MEANS THAT SOMEONE CURRENTLY HAS HCV INFECTION.**

**The good news is that HCV can be cured!**

# Hepatitis C Can be Cured!

- Hepatitis C is curable and almost 100% effective when taken as prescribed. Visit [bit.ly/DOHmap](http://bit.ly/DOHmap) to find places near you that offer hepatitis C treatment!
  - #HepatitisC  
#HepC #HepCCanBeCured  
#GetTested #PADOH

**HEPATITIS C  
CAN BE CURED!**

**IF TAKEN AS PRESCRIBED, HEP C  
MEDICATION IS ALMOST 100% EFFECTIVE**

FOR MOST PEOPLE, HEP C  
TREATMENT MEANS:

- Taking 1-3 pills a day
- For 8-12 weeks
- With almost no side effects
