

# PREVENT HIV WITH PrEP!

## What is PrEP?

*PrEP IS A MEDICATION THAT PEOPLE CAN TAKE TO PREVENT HIV*

### PREP IS FOR ANYONE LOOKING TO PREVENT HIV!

PrEP is recommended for sexually active people who don't know the HIV status of their sexual partners or whose partners are living with HIV, and for people who use injection drugs.

PrEP stands for **Pre-exposure Prophylaxis**, which means **PREVENTING** an HIV infection.

PrEP can be taken as a pill once per day, or as an injection every 60 days.

## Most insurance plans and state Medicaid programs cover PrEP

The Ready, Set, PrEP program makes PrEP medication available at no cost to those who qualify.
