

# HIV SELF-TESTING

## CHECK YOUR HIV STATUS WITH THESE TESTS

**Rapid self-tests** include supplies to collect oral fluid and results are available in 20 minutes. If the result is reactive, you'll need to follow up with a lab test.

**Mail-in self-tests** include supplies to collect dried blood from a fingerstick at home. The sample is sent to a lab for testing and results are delivered by a health care provider.

You can buy these online or at a pharmacy!

You or your health care provider can order the test online!

# EVERYONE SHOULD BE TESTED!

Some self-tests might be free or covered by your insurance. Check out these links!

TO ORDER A RAPID SELF-TEST IN PA AT NO COST, GO TO: [GETMYHIVTEST.COM/](https://getmyhivtest.com/)

TO ORDER A MAIL-IN TEST, GO TO: [TESTING.COM/TESTS/AT-HOME-HIV-TEST/](https://testing.com/tests/at-home-hiv-test/)
